EcoPulse
SMALL ACTIONS. GREENER FUTURE.

BRAND IDENTITY GUIDELINES

A practical visual system for a more sustainable future

Small Actions. Greener Future.

Project 1 • Brand Identity Kit Design • 2026

01 / Brand foundation

Brand name: EcoPulse

Purpose: Encourage people to make practical, everyday choices that reduce waste and support environmental responsibility.

Audience: Students, young adults, households and community groups interested in sustainable living.

Personality: Modern, optimistic, approachable, practical and trustworthy.

Brand promise: Small actions can contribute to a greener future when they become everyday habits.

Voice and messaging

Use plain language, positive calls to action and specific advice. Avoid guilt-based messaging or unsupported environmental claims. Prefer phrases such as “Repair before replacing” and “Choose responsible recycling.”

02 / Logo system

The circular outline represents a connected planet, the leaf represents nature, and the pulse line suggests active, everyday change.

Primary logo: Use on light cream or white backgrounds.

Icon: Use for avatars, small labels and compact applications.

Clear space: Keep at least the height of the leaf around the logo. Avoid crowding it with text or decorative elements.

Do not: Stretch, rotate, recolor arbitrarily, add heavy effects or place the logo over low-contrast imagery.

03 / Color palette

Color	HEX	Recommended use
Forest Green	#174D38	Primary logo, headings, key text
Leaf Green	#5B946A	Illustrations, highlights, secondary actions
Soft Sage	#D7E8C5	Cards, backgrounds, supporting shapes
Warm Cream	#F6F2E7	Main background
Golden Accent	#E8B84A	Small emphasis, calls to action

04 / Typography

Headline style: Poppins Bold or a similar geometric sans-serif. Use short, confident headings.

Body style: Inter Regular or a highly readable sans-serif. Use generous line spacing and avoid long all-caps paragraphs.

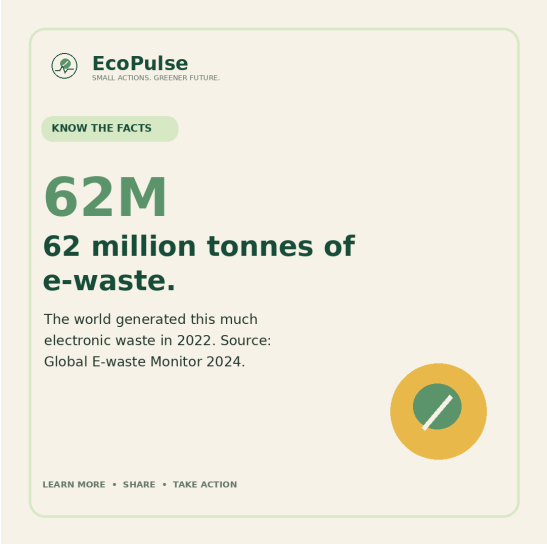

Hierarchy: Headline → supporting sentence → small source or action line.

05 / Layout and imagery

Use a simple grid, generous margins, rounded cards and a restrained set of icons. Prefer clear, flat illustrations and real-world imagery about repair, reuse and responsible recycling. Maintain strong contrast and make key messages readable on mobile.

06 / Social media applications

The supplied social posts demonstrate a consistent logo position, headline scale, palette and footer. Adapt the same system for future campaign content.

07 / File inventory

Primary logo: SVG and PNG. Icon: PNG. Social templates: three 1080 × 1080 PNG files. Brand board: PNG. This document: PDF.

Design note: EcoPulse is a fictional concept brand created for this portfolio project. All brand strategy and design examples are concept work, not a claim of client engagement.
