EcoPulse: E-Waste — Don't Trash the Future

Animated Infographic Storyboard • 55 seconds • 16:9 • 1080p

00–06 sec | Hook

On-screen copy: Where do your old electronics go?

Motion/audio: Old phone and laptop icons slide in. Title snaps into place. Music begins with a light, upbeat beat.

06–18 sec | The scale

On-screen copy: 62 million tonnes of e-waste were generated worldwide in 2022.

Motion/audio: Large “62M TONNES” counter scales up; supporting label fades in. Keep the statistic on screen long enough to read.

18–30 sec | The gap

On-screen copy: Only 22.3% was documented as formally collected and recycled.

Motion/audio: A circular chart fills to 22.3%; the remaining portion stays muted. Cite Global E-waste Monitor 2024.

30–47 sec | What we can do

On-screen copy: Repair and reuse. Donate working devices. Recycle through authorized collection channels.

Motion/audio: Three icon cards appear one by one: repair, donate, recycle. Use simple slide and scale transitions.

47–55 sec | Call to action

On-screen copy: Give your old electronics a responsible next life. EcoPulse — Small Actions. Greener Future.

Motion/audio: End card with logo and tagline. Source credit remains readable at the bottom.

Data source: ITU and UNITAR, The Global E-waste Monitor 2024. The report estimates 62 million tonnes generated in 2022 and 22.3% documented as formally collected and recycled.
